

MOHAMED AMMAR

Software Engineering Undergraduate | Backend Development | Java, C# and SQL

+94 77 446 4661 | ammarmhmd1881@gmail.com | GitHub | LinkedIn | portfolio | Bandaragama, Sri Lanka

PROFESSIONAL SUMMARY

Software Engineering undergraduate expected to graduate in February 2028, with hands-on experience in **Java, C#, JavaScript, SQL, MySQL, JDBC, object-oriented programming, backend development, REST APIs and CRUD operations**. Developed web and desktop applications involving database integration, responsive interfaces, testing and debugging. Familiar with **Git/GitHub and Agile Scrum practices**, with strong problem-solving, communication and teamwork skills. Interested in **backend software engineering, financial technology and AI engineering**. Available to join the **six-month internship from 9 November 2026** and eligible to work in **Sri Lanka without restrictions**.

EDUCATION

Esoft UNI | Bambalapitiya Mar 2025 - Feb 2028
BSc (Hons) Computing Science in Software Engineering (TOP UP) – Kingston University (UK) CGPA : Pending

- Pursuing a BSc (Hons) Computing Science in Software Engineering Top-Up degree after completing the Pearson BTEC Level 5 HND in Computing modules.
- Developed practical knowledge in programming, software development, databases, data structures, algorithms, and systems analysis.
- Gained experience in UI/UX design, requirements analysis, application development, testing, and technical documentation.
- Strengthened problem-solving, research, teamwork, and project management skills through academic software projects.

Binzo College | Bandaragama Mar 2023 - Jun 2023
Web Design (WordPress) CGPA : Merit

- **Designed** and **developed** responsive, user-friendly websites using WordPress.
- Skilled in **theme customization**, plugins, page builders, and basic website maintenance.

PROJECTS

Expense Tracker | Web Application | GitHub Jul 2026 - Jul 2026
Java Application Developer

- Developed a personal expense tracking application using **Java, MySQL, HTML, CSS and JavaScript**.
- Implemented **CRUD operations** to add, view, update and delete expense records.
- Connected Java to MySQL using **JDBC** and **Prepared Statement** for database operations.
- Implemented expense filtering by **month and category**, with monthly totals, daily totals and expense summaries.
- Built a responsive browser-based interface and connected the frontend to the Java backend using JavaScript.
- Used **Git and GitHub** for version control and source code management.

Technologies / Tools Used : Java, JDBC, MySQL, HTML, CSS, JavaScript, Git

E-Commerce Website | Website May 2026 - May 2026
Full-Stack Developer

- Developed a responsive full-stack e-commerce application using **React, Tailwind, Node.js, Express.js and MongoDB**, optimized for desktop, tablet and mobile devices.
- Implemented core features including product browsing, user authentication, shopping cart management and order processing.
- Developed RESTful APIs using **Node.js and Express.js** and integrated MongoDB to manage customer, product, cart and order data.
- Used **Git and GitHub** for version control, source-code management and project updates.
- Tested and debugged frontend and backend functionality, resolved application issues and improved overall reliability and user experience.

Technologies / Tools Used : React, Tailwind CSS, Node.js, Express, MongoDB

Delivery Management System | GitHub Jul 2025 - Aug 2025
C# Application Developer

- Designed a desktop-based Delivery Management System using C# and SQL, applying object-oriented programming principles to organise customers, orders, deliveries, drivers and payments.
- Implemented CRUD operations, relational database queries, data validation, exception handling and business rules.
- Debugged application and database issues and tested core workflows to improve data accuracy and system reliability.
- Developed reporting functionality to support delivery tracking and operational decision-making.

Technologies / Tools Used : C#, SQL, OOP

SKILLS

Programming Languages :	Java, C#, JavaScript, Python, SQL
Frontend Development :	HTML5, CSS3, React, Next.js, Tailwind CSS, Responsive Design
Backend Development :	Java, JDBC, Node.js, Express.js, Rest APIs, OOP
Databases :	MySQL, MongoDB, Relational database design
Tools & Platforms :	Git, GitHub, VS Code, Vercel, XAMPP, WordPress
Software Concepts :	Data Structures, Algorithms, Agile/Scrum, Object-Oriented Programming, CRUD Operations
Soft Skills :	Communication, Problem Solving, Teamwork, Critical Thinking, Leadership, Time Management, Adaptability, Collaboration, Decision Making, Continues Learner
Languages :	English, Tamil, Sinhala
